

HOUSE SHAPED BOOKLET FROM A SINGLE SHEET OF PAPER

This book can be made with any size, rectangular paper.

1. Fold the paper in half and in half again widthwise (short end to short end). Open it up and fold it in half lengthwise (long end to long end). There should be 8 boxes. Open the paper.

2. Place the paper in the landscape position. Lightly draw an X from corner to corner in the 2nd box from the left ABOVE the horizontal fold. Lightly draw an X from corner to corner in the 2nd box to the right BELOW the horizontal fold.

3. Outline the 2 sides of the triangles that are formed with their bases on the horizontal fold. Cut along this zigzag line. Erase the guide lines.

4. Fold the paper in half lengthwise (long end to long end). Hold the edges of the paper and push towards the centre until you see a box formed. Keep pushing until all the pages line up.

5. Flatten the paper. Fold it in half to create the house shaped book.

6. Open the book and stand it up to see inside and outside the house.
